About Us

PCC Exol SA is a major player in the European surfactants market. In the eastern and central-eastern part of the continent, it is the undisputed leader in its industry. Most of the production facilities and the company's headquarters are located in Brzeg Dolny, Poland. Here we develop, test and manufacture a wide range of anionic, non-ionic and amphoteric surfactants and speciality industrial formulations.

New products are continuously added to the portfolio in response to market trends and individual customer requirements. The surfactants produced at the plants have a very wide range of industrial applications. They are used as wetting agents, emulsifiers, auxiliaries in paper, metallurgy and many other industries, as well as in

household chemicals, personal care products and textiles.

Sustainable development is an important element of PCC EXOL's business approach. The company develops its management practices and processes to address environmental, social and ethical challenges. The scope of these activities is determined by the company's strategic priorities, operational capabilities and available, verifiable supporting documentation. Among other areas, PCC EXOL undertakes initiatives aimed at supporting the circular economy, improving energy and resource efficiency, enhancing safety performance, and promoting sustainability-related practices within selected elements of its value chain through cooperation with suppliers and customers.

ROKAcet KO400G

Chemical description

ROKAcet KO400G is a nonionic surfactant, mainly used in detergent applications. This product contains renewable plant raw materials, such as polyoxyethylene fatty acid esters and glycerine.

The active substance content exceeds 99%. This surfactant is in the form of a straw to light yellow liquid, with a low viscosity and a solidification temperature below -10°C, which makes it easier to handle in process conditions.

Benefits:

- contains plant crops
- the product is not classified as hazardous to the environment in accordance with Regulation (EC) No 1272/2008 (CLP)
- the product meets the criteria for ingredients in formulations certified by the Nordic Swan and EU Ecolabel
- the product meets the biodegradability criteria in accordance with OECD methodology*
- concentrated form

* Biodegradability data are based on literature sources.

Physicochemical parameters

• Appearance at temperature (20-25°C)	liquid
• Colour (Haznen units) (20-25°C)	max 120
• pH of 5% solution	5.4-6.9
• Saponification value, mg KOH/g	57-62
• Hydroxyl number, mg KOH/g	285-295

Hydrotrope

ROKAcet KO400G is an excellent product for use in detergent formulations with very high concentration. The use of this product in the formulation eliminates the need for the use of solvents. In order to present its very good hydrotroping properties, a formula of concentrated heavy duty liquid detergent was prepared.

The use of ROKAcet KO400G allowed to obtain a stable, clear formulation. The appearance of the formulations with the use of Laureth-7 and C13-15 pareth-7 is also presented below - the effect of using these products is to obtain cloudy systems or even as a gel.

Washing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Heavy duty liquid detergent, HDLD

Inci name	Brand name	Concentration [%]	Function
Sodium Laureth Sulfate	SULFOROKAnol L227/1 MB	30.0	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	10.0	Breaks down stains
Potassium Cocoate	EXOsoft PC35 MB	3.0	Breaks down stains
Tetrasodium Glutamate Diacetate	N,N-Dicarboxymethyl glutamic acid tetrasodium salt (GLDA), 40%	2.0	Chelator
Sodium Citrate	Sodium citrate	2.5	Chelator
Fluorescent Brightener	Fluorescent brightener	0.1	Optical brightener
Enzymes	Multi-enzyme blend, liquid	0.2	Breaks down different types of stains
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		7.0 - 8.0
Viscosity [cP]	Brookfield LV, T: 20°C	up to 100
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix Optical brightener with water until dissolved.
2. Add Sodium citrate and mix until a homogeneous solution is obtained.
3. Then add SULFOROKAnol L227/1 MB and mix.
4. Add ROKAcet KO400G MB and mix.
5. Then add EXOsoft PC35 MB and mix a homogeneous solution is obtained.
6. Mix GLDA and finally, add the enzyme blend.
7. Mix until a clear liquid is obtained.

Washing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Universal liquid detergent, ULD

Inci name	Brand name	Concentration [%]	Function
Sodium Laureth Sulfate	SULFOROKAnol L227/1 MB	40.0	Removes stains/ foaming agent
Magnesium Laureth Sulfate	–	5.0	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	10.0	Breaks down stains
Potassium Oleate	EXOsoft PO30 MB	3.0	Breaks down stains
Glycerin	Glycerin	6.0	Prevents products from drying out
Tetrasodium Glutamate Diacetate	N,N-Dicarboxymethyl glutamic acid tetrasodium salt (GLDA), 40%	2.5	Chelator
Fluorescent Brightener	Fluorescent brightener	0.1	Optical brightener
Enzymes	Multi-enzyme blend, liquid	0.2	Breaks down different types of stains
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		7.0 - 8.0
Viscosity [cP]	Brookfield LV, T: 20°C	up to 100
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix Optical brightener with water until dissolved.
2. Add SULFOROKAnol L227/1 MB and Magnesium Laureth Sulfate.
3. Mix until a homogeneous solution is obtained
4. Then add ROKAcet KO400G MB and mix.
5. Then add EXOsoft PC35 MB and mix a homogeneous solution is obtained.
6. Mix Glycerin and GLDA.
7. Finally, add the enzyme blend and mix until a clear liquid is obtained.

Performance tests of washing liquid detergents

Detergency - the ability of the detergent to remove soils from the fabric surface during the laundering process. Detergency tests were performed using our own method, with a different soils:

Enzymatic

- Blood, aged
- Chocolate ice cream, aged

Bleachable

- Curry
- Wine, aged
- Grass/mud, with thickening agent
- Highly discriminative tea
- Grass, pure
- Standard clay
- Beta-carotene on cotton, circular stain
- Baby food carrot/potato

Greasy

- Fluid make-up
- Spaghetti sauce with beef
- Butter with colorant
- Beef fat, colored with Sudan Red
- Dirty Motor Oil (DMO)

Test conditions:

- automatic washmachine
- 40°C or cold water (with one of the formulations)
- water hardness 13 °dH
- cotton program
- load - calculated for 2 kg of dry, white towels
- the dosing of the market product was verified with the information on the label
- fabric soiled with standard dirt

After the washing process was performed, the standardly disturbed fabrics were dried and ironed, and then the degree of washing was assessed by measuring parameter dE from the CIE LAB scale, as the difference between the initially disturbed stain and the degree of its washing. The greater dE value, the better the washing outcome.

Washing liquid

Washing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Liquid detergent for low temperature use, LDFLTU

Inci name	Brand name	Concentration [%]	Function
Sodium Laureth Sulfate	SULFOROKAnol L227/1 MB	38.0	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	9.0	Breaks down stains
Potassium Cocoate	EXOsoft PC35 MB	7.0	Breaks down stains
Tetrasodium Glutamate Diacetate	N,N-Dicarboxymethyl glutamic acid tetrasodium salt (GLDA), 40%	3.0	Chelator
Sodium Citrate	Sodium citrate	2.5	Chelator
Fluorescent Brightener	Fluorescent brightener	0.1	Optical brightener
Enzymes	Multi-enzyme blend, liquid	0.5	Breaks down different types of stains
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		7.5-8.5
Viscosity [cP]	Brookfield LV, T: 20°C	up to 100
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix optical brightener with water until dissolved.
2. Add sodium citrate and mix until a homogeneous solution is obtained.
3. Then add SULFOROKAnol L227/1 MB and mix.
4. Add ROKAcet KO400G MB and mix.
5. Then add EXOsoft PC35 MB and mix a homogeneous solution is obtained.
6. Mix GLDA and finally, add the enzyme blend.
7. Mix until a clear liquid is obtained.

Washing liquid – low temperature

Hand dishwashing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Economic hand dishwashing liquid

Inci name	Brand name	Concentration [%]	Function
Sodium Laureth Sulfate	SULFOROKAnol L277/1 MB	13.5	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	4.0	Cleaning agent
Cocamidopropyl Betaine	ROKAmina K30 MB	3.0	Foaming agent/cleaning agent
Sodium Citrate	Sodium citrate	1.0	Chelator
Citric Acid	Citric acid, monohydrate, 50%	0.08	pH adjuster
Sodium Chloride	Sodium chloride	0.8	Thickener
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		5.5-6.5
Viscosity [cP]	Brookfield LV, T: 20°C	3000-3500
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix water with sodium citrate until dissolved.
2. Add SULFOROKAnol L227/1 MB and ROKAcet KO400G MB – mix until a homogeneous solution is obtained.
3. Then add citric acid solution and ROKAmina K30 MB - mix.
4. Add NaCl and mix a homogeneous solution is obtained.

Hand dishwashing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Mild hand dishwashing liquid

Inci name	Brand name	Concentration [%]	Function
Ammonium Lauryl Sulfate	ROSULfan A70 MB	6.7	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	1.0	Cleaning agent
Cocamidopropyl Betaine	ROKAmina K30 MB	3.0	Foaming agent/cleaning agent
Sodium Polyacrylate	EXOlat ZA	0.4	Sequestrant
Sodium Chloride	Sodium chloride	0.4	Thickener
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		5.5-6.5
Viscosity [cP]	Brookfield LV, T: 20°C	3500-3700
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix water with ROSULfan A70 MB until dissolved.
2. Add EXOlat ZA and ROKAcet KO400G MB
– mix until a homogeneous solution is obtained.
3. Then add ROKAmina K30 MB - mix.
4. Add NaCl and mix a homogeneous solution is obtained.

Hand dishwashing liquid detergent

The product meets the criteria for ingredients in formulations certified by the EU Ecolabel

Hand dishwashing liquid

Inci name	Brand name	Concentration [%]	Function
Sodium Lauryl Sulfate	ROSULfan L MB	9.0	Removes stains/ foaming agent
Sodium Laureth Sulfate	SULFOROKanol L170/1 MB	4.9	Foaming agent/cleaning agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G MB	4.0	Cleaning agent
Cocamidopropyl Betaine	ROKAmina K30 MB	4.8	Foaming agent/cleaning agent
Sodium Polyacrylate	EXOlat ZA	0.3	Sequestrant
Glycerine	Glycerine	5.0	Solvent
Aqua	Water	up to 100.0	Solvent

Appearance	visual method	clear liquid
pH		5.5-6.5
Viscosity [cP]	Brookfield LV, T: 20°C	3500-4500
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix water with ROSULfan L MB and SULFOROKanol L170/1 MB until dissolved.
2. Add EXOlat ZA, ROKAcet KO400G MB and glycerine - mix until a homogeneous solution is obtained.
3. Then add ROKAmina K30 MB and mix a homogeneous solution is obtained.

Hand dishwashing liquid detergent

Highly concentrated hand dishwashing liquid

Inci name	Brand name	Concentration [%]	Function
Ammonium Lauryl Sulfate	ROSULfan A70	20.0-25.0	Removes stains/ foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G	5.0	Cleaning agent
Laureth-7	ROKAnol L7	2.0	Cleaning agent
Cocamidopropyl Betaine	ROKAmina K30	3.0-10. 0	Foaming agent/cleaning agent
Sodium Polyacrylate	EXOlat ZA	1.0	Sequestrant
Glycerine	Glycerine	5.0	Solvent
Aqua	Water	57.0-59.0	Solvent

Appearance	visual method	clear liquid
pH		5.5-6.5
dry matter, %		approx. 31
Viscosity [cP]	Brookfield LV, T: 20°C	1500-4000
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix ROSULfan A70 with water and glycerine until dissolved.
2. Add ROKAcet KO400G and mix until a homogeneous solution is obtained.
3. Then add ROKAnol L7 and mix.
4. Add EXOlat ZA and mix.
5. Then add ROKAmina K30 and mix a homogeneous solution is obtained.

Hand dishwashing liquid detergent

Highly concentrated hand dishwashing liquid – 2 anionic surfactants

Inci name	Brand name	Concentration [%]	Function
Ammonium Lauryl Sulfate	ROSULfan A70	20.0	Removes stains/ foaming agent
Magnesium Laureth Sulfate	–	11.0	Cleaning agent/foaming agent
PEG-6 Glyceryl Cocoate	ROKAcet KO400G	5.0	Cleaning agent
Laureth-7	ROKAnol L7	2.0	Cleaning agent
Cocamidopropyl Betaine	ROKAmina K30	5.0	Foaming agent/cleaning agent
Sodium Polyacrylate	EXOlat ZA	1.0	Sequestrant
Glycerine	Glycerine	5.0-9.0	Solvent
Aqua	Water	41.0-51.0	Solvent

Appearance	visual method	clear gel
pH		5.5-6.5
dry matter, %		approx. 40
Viscosity [cP]	Brookfield LV, T: 20°C	3500-3400
Stability	1 month at 5°C, 20°C, 40°C	confirmed

Procedure:

1. Mix ROSULfan A70 with water and glycerine until dissolved.
2. Add Magnesium Laureth Sulfate and mix until a homogeneous solution is obtained.
3. Then add ROKAcet KO400G and ROKAnol L7 - mix.
4. Add EXOlat ZA and mix.
5. Then add ROKAmina K30 and mix a homogeneous solution is obtained.
