4. INVENTORY STATUS

Country / Region	Regulation / Inventory List	Status*	Comments
Australia	AICS	Listed	In accordance to the EU Regulation (EC) No 1907/2006 (REACH) Roflam P (TCPP) due to its chemical nature meets the definition of UVCB substance. The reason is that during the production process aside from a main isomer other isomers always arise. In accordance to the REACH, UVCB substances are treated as one substance with degree of purity 100%. CAS no. assigned for this UVCB substance is relatively new and unknown to regulatory authorities in non-EU countries. Most of non-EU countries identified the product by its main constituent: tris(2-chloro-1-methylethyl) phosphate, CAS no. 13674-84- 5 (50 - 85 % (w/w)). Based on the information above all of the non-EU lists have been verified by the CAS number of the main constituent (CAS # 13674-84-5) only.
