

ROKAmin SR22

| | |
|-------------------------------|---|
| CHEMICAL NAME | Amines, C16-18 alkyl, ethoxylated, 5-25 EO |
| INCI NAME | PEG-22 Hydrogenated Tallow Amine |
| CAS NUMBER | 61791-26-2 |
| FUNCTION | Emulsifier |
| TECHNICAL REQUIREMENTS | Appearance light brown to brown paste Amine value, mg KOH/g.....37 ÷ 45 |
| GENERAL DATA | Molecular weightapprox. 1250 Solubility in watergood Other solvents..... low aliphatic alcohols Density at 50°C, g/mlapprox. 1.024 Odour.....characteristic Boiling point, °Cabove 200 (with decomposition) Flash-point, °Cabove 130 Solidification point, °C below 30 |
| APPLICATION | Rokamin SR22 is used as an equalizer (equalizing agent) in fibre dyeing processes. |
