

Dinonylphenol

CHEMICAL NAME Phenol, 2,4-dinonyl-, branched

CAS NUMBER 84852-14-2

FUNCTION Chemical intermediate

TECHNICAL REQUIREMENTS

Appearance: colourless or pale yellow oily liquid with the characteristic smell

Water content, %wt., max. 0,1

Nonylphenol content, %wt., max. 10

Dinonylphenol content, %wt., min. 90

Colour (iodine number), mg J2/100 ml, max 5

APPLICATION

Technical surfactants
Epoxy and phenolic resins industry

Product is a yellow to brown oily liquid, with the characteristic smell. It contains mainly 2,4-dinonylphenol. Dinonylphenol is used for the production of industrial surfactants and phenolic resins.
