

Chemfac NB-2268/30

CHEMICAL NAME	Neutralized Organic Phosphate Ester
INCI NAME	-
CAS NUMBER	67711-84-6
FUNCTION	Lubricant
TECHNICAL REQUIREMENTS	pH (neat).....6 – 8 Solids, %.....28 – 32
GENERAL DATA	Appearance @ 25°CClear Liquid Pounds Per Gallon..... 9.16 Specific Gravity @ 25°C..... 1.1 Aqueous Solubility Dispersible
APPLICATION	Chemfac NB-2268/30 is derived from a high molecular weight nonionic which provides lubricity, emulsification and detergency attributes to numerous industries. Due to compatibility in electrolytes, Chemfac NB-2268/30 may be used in alkaline cleaners in the industrial and household industry sectors. Chemfac NB-2268/30 functions as a film-forming lubricant which works particularly well on soft metals.
