

## **Roksol STR**

CHEMICAL NAME	The mixture of emulsifiers, fatty acid amides and chlorinated organic compounds
TECHNICAL REQUIREMENTS	Appearance brown emulsion, acceptable dissection  Water content, %(m/m) max. 22  Content of fatliquoring substance in the commercial product, %(m/m) min. 65  Emulsifying capacity, degree of the scale 2  Stability of emulsion after 2 h, degree of the scale min. 1  Electrolytes resistance
	at room temperature, degree of the scalemin. 4
GENERAL DATA	Solubility in waterforms milky oil/water emulsions Flash point, °Cabove 100
APPLICATION	Used in the tanning industry for fat liquoring of the skin, primarily glove and clothing chrome tanning.
