

Chemstat® PS-101

CHEMICAL NAME	Aliphatic Sulfonate
INCI NAME	-
CAS NUMBER	68037-49-0
FUNCTION	Antistatic Agent
TECHNICAL REQUIREMENTS	Active Content, % 90 Minimum Free Paraffin, % 1 Maximum Sodium Sulfate, % 6 Maximum

GENERAL DATA Appearance @ 25°C Off White Pastille

APPLICATION Chemstat®PS-101 is an internal antistatic agent which is effective in most thermoplastics. It is effective in both plastic film and in molded products. It is recommended that Chemstat®PS-101 be incorporated into the polymer before processing to achieve permanent antistatic properties. Chemstat®PS-101 can be applied externally; however, it will only provide temporary protection because the antistat will not endure rubbing or washing.
