

Roksol MA

CHEMICAL NAME	A mixture of nonionic surfactant and polymers
TECHNICAL REQUIREMENTS	Appearance colorless to white thick turbid liquid (after time it is possible sedimentation while the clarified top layer) pH of 1% solution 5.0 ÷ 7.0 Solidification point (water solution), °C 52 ÷ 60 Water content, % (m/m) max. 2
GENERAL DATA	Solubility in water good Odor weak, characteristic Density at 20°C, g/ml approx. 1.07
APPLICATION	Use as the wetting agent, detergent, emulsifier and cleaning for all types of fibers.
