

ROKAnol[®] LP100

CHEMICAL NAME	Polyoxyalkylene glycol fatty alcohol ether
INCI NAME	-
CAS NUMBER	-
FUNCTION	Low foaming agent, cleansing agent
TECHNICAL REQUIREMENTS	Appearance at temperature (20±25)°Cliquid Colour (Hazen units) at (20±25) °Cmax. 100 pH of 1% solution5.0 ÷ 7.0 Cloud point (of 1% water solution), °C72 ÷ 76 Water content, %(m/m)max. 5
GENERAL DATA	Molecular weightapprox. 1100 Solubility in water at (20°C)good Density at 25°C, g/mlapprox. 1.04 Viscosity at temperature 20°C, cPapprox. 245 Solidification point, °Capprox.. 9
APPLICATION	Low foaming component of surfactants, washing and cleaning agents and in industrial applications. It can be applied in a mixture with other non-ionic additives and in mixtures with cationic and anionic compounds.
