

ROKO CHLORIN

DESCRIPTION

Liquid for disinfecting rooms as well as surfaces and equipment in contact with food and animal feed in the food industry, air conditioning systems, water tanks and drinking water supply systems, as well as for disinfecting drinking and pool water. For use in CIP circulation systems (tanks, pipes, heat exchangers, mixers, fillers, etc.) and in the spray form.

COMPOUNDS

chlorine-based bleaching compounds, phosphonates

TECHNICAL REQUIREMENTS

Appearance.....transparent or slightly
opalescent liquid

pHmin. 11.5

Density in 20°C, g/cm³ 1.180 - 1.280

APPLICATION

Chlorin can be used for stainless steel devices used in the food industry. Do not use on copper surfaces and light metals (e.g. aluminum)! In order to eliminate the adverse effect of the preparation on the surface with prolonged contact time, perform the test in a low-visible place

Before using the product, read the material safety data sheet.

Information presented herein has been given in good faith and to the best of our current knowledge and experience. The compliance of the specific properties of the supplied product with the data given herein and its fitness for the intended purpose should be checked before the product is used. The producer reserved the right to modify the information presented herein as a result of technological development and improvement of the product by producer.
