

EXOdis PC340

CHEMICAL NAME	Alcohols, C10-16, ethoxylated, sulfosuccinates, disodium salts
INCI NAME	-
CAS NUMBER	-
FUNCTION	Anionic wetting and dispersing agents
TECHNICAL REQUIREMENTS	Appearance at temperature (20±25)°C.....pale yellow or yellow liquid Active content, %(m/m)..... min 38 pH of 1% solution.....5.5 ÷ 8.5
GENERAL DATA	Solubility in water.....unlimited Density at 20°C, g/mL.....approx 1.1
APPLICATION	EXOdis PC340 is an anionic wetting and dispersing agents dedicated to produce water-based pigment concentrates with inorganic pigments. The main advantage of the product is its perfect stabilization of the viscosity of yellow oxide pigment concentrates. EXOdis PC340 is especially dedicated for Point of Sales colourants to tint both WB and SB products. The recommended usage level is 4 ÷ 15% in pigment concentrates with inorganic pigments. The product is free of VOC and APEO.
