

TopMeister Beton Extra - impregnation for concrete and cobblestone

CHEMICAL NAME	Mixture of potassium hydroxide and silane
CAS NUMBER	Mixture
FUNCTION	Impregnating agent
TECHNICAL REQUIREMENTS	<p>Apperance at (20±25)°C..... Colourless liquid without mechanical impurities</p> <p>pH of the solutionmin. 12</p> <p>Solubility in watervery good</p> <p>Density at temperature, 20°C, g/ml..... 1,04</p> <p>Odorodourless</p>
APPLICATION	<p>Professional, specially reinforced preparation designed to protect against penetration of dirt and gives water-repellence to concrete and concrete paving stones, concrete fences and elements of small architecture (curbs, pavements). The innovative formula creates an impermeable protective coating. Protects against the ingress of water with dirt. The protected surface is easier to clean and prevents moss from growing. TopMeister Beton Extra is designed to protect coloured and uncoloured concrete as well as concrete with added topping.</p>
