

TopMeister Beton - impregnation for cobblestone

CHEMICAL NAME	Mixture of potassium hydroxide and silane
CAS NUMBER	Mixture
FUNCTION	Impregnating agent
TECHNICAL REQUIREMENTS	<p>Apperance at (20±25)°C..... Colourless liquid without mechanical impurities</p> <p>pH of the solutionmin. 12</p> <p>Solubility in watervery good</p> <p>Density at temperature, 20°C, g/ml..... 1,04</p> <p>Odorodourless</p>
APPLICATION	<p>Professional preparation designed to protect against penetration of dirt, and gives water-repellence to concrete paving stones, concrete fences and elements of small architecture (curbs, pavements). The innovative formula creates an impermeable protective coating. Protects against the ingress of water with dirt. TopMeister Beton is designed to protect raw concrete, unstained concrete and paving stones without any topping.</p>
