COMPOSITION	Active substance: Ethanol 83,15 g/100 g
TECHNICAL REQUIREMENTS	Appearance transparent, opalescent liquid Colourcolourless Density at 20°C, g/cm ³0.900 ±0.150
PRODUCT DESCRIPTION	<p>Liquid for hygienic and surgical hand disinfection by rubbing, as well as for disinfecting surfaces and devices that do and do not come into contact with food. For use in the medical field and areas requiring proper hygiene - food industry, public utilities, industrial and domestic conditions. It has bactericidal, fungicidal and viricidal properties.</p> <p>Product available only on the German market. Notification number: N-93028</p> <p>The product complies with the recommendations of the WHO (World Health Organisation) and RKI (German Robert Koch Institute).</p>
APPLICATIONS	<p>Ready to use product.</p> <p>Hygienic disinfection: rub 3 ml of the preparation into previously washed hands for 30 seconds.</p> <p>Surgical disinfection : rub 3 ml of liquid into clean hands and wrist for exactly 3 minutes.</p> <p>Hand skin should be moistened with liquid for the entire duration of the product's action. Let your hands dry. Do not wipe hands. Do not rinse with water. Wash your hands before using the product to achieve the correct effect.</p>

Surface disinfection:

Apply the preparation to a previously wiped surface until it becomes completely moist. The surface should be kept moist until a disinfection effect is achieved:

bactericidal effect: 5 minutes

fungicidal effect: 15 minutes

virucidal effect: 1 minute.

Does not require rinsing.

Check the operation of the fluid on the less visible part of the surface.

Do not use on surfaces sensitive to alcohol.

The product is intended for general and professional use.
