

ROKO PROFESSIONAL CHLORINE P 2

DESCRIPTION

Ready to use liquid with bactericidal, virucidal and fungicidal properties. Product for general and professional use - with the use of personal protective equipment. For disinfecting surfaces such as: pavements, pedestrian crossings, slabs at bus stations and railway platforms, sheds or public utility stops. For cleaning and disinfecting floors, floors, waste containers, walls, doors, windows in warehouses, cloakrooms, in workplaces, including the food industry, in health care facilities, in public facilities and at home. For disinfecting industrial equipment and installations as well as contact surfaces with food. Rinse disinfected surfaces in contact with food with drinking water. It is also used to disinfect air conditioning systems.

No. of the permit issued in accordance with Art. 55 sec. 1 of Regulation 528/2012: 0344 / TP / 2020 of 08/04/2020

COMPOSITION

Active substance: active chlorine released by sodium hypochlorite, WE: 231-668-3, CAS: 7681-52-9 content: 2 g / 100g

TECHNICAL REQUIREMENTS

Appearancetransparent or slightly opalescent liquid

Color.....colorless to yellow

Density at 20 ° C, g / cm ³1,035 ± 0,020

APPLICATION

How to use: Washing-disinfecting liquid - shows bactericidal and virucidal properties - contact time 5 minutes. Fungicidal action contact time 15 minutes. The product is intended for use in a ready-to-use form. Disinfect large surfaces with pressure washers, spray smaller surfaces, rinse the disinfected surface with drinking water if necessary.

Recommendations: Check the action of the fluid on the less visible part of the surface. Do not use on surfaces sensitive to the action of bleaching agents, e.g. wooden surfaces, panels, fabric materials. Irreversible whitening and discoloration of the surface may occur. In case of uncontrolled liquid spillage onto the surface, rinse immediately with water. Use ventilation when used in confined spaces because of

persistent chlorine odor. The ventilation time after using the preparation is 10-15 minutes. Do not use the surface of metals (chromium, paterowanych etc.), Enamel, lacquer, linoleum, aluminum, surface of a worn or scratched. Rinse disinfected surfaces in contact with food with drinking water. "Attention! Do not use together with other products. May release dangerous gases (chlorine)."
