

ROKO PROFESSIONAL CHLORINE

DESCRIPTION

Liquid for disinfecting rooms, surfaces and devices in contact with food and animal feed in the food industry, air conditioning systems, water reservoirs and drinking water supply systems, as well as for disinfecting drinking and swimming pool water. For use in CIP circulation systems (tanks, pipes, heat exchangers, mixers, fillers, etc.) and in spray form

It has a bactericidal and fungicidal effect.

Active substance: active chlorine released by sodium hypochlorite EC 231-668-3, CAS 7681-52-9, Content 6.5 - 12 g / 100 g

COMPOSITION

Chlorine-based bleaching compounds, phosphonates

TECHNICAL REQUIREMENTS

Look transparent or slightly opalescent liquid

pH..... min. 11,5

Density at 20°C, g / cm³1,180 - 1,280

APPLICATION

ROKO PROFESSIONAL CHLORINE can be used for stainless steel devices used in the food industry. Do not use on copper and light metal surfaces (e.g. aluminum)! In order to eliminate the negative influence of the preparation on the surface with prolonged contact time, the test should be performed in a hardly visible place

Please read the product safety data sheet before using the product.

PRODUCT FOR PROFESSIONAL USE!
