LÍQUIDO DE REMOÇÃO DE  
MAQUIAGEM [KD-70]

# LÍQUIDO DE REMOÇÃO DE MAQUIAGEM [KD-70]

| ESTÁGIO | NOME DA INCI                       | MARCA       | CONCENTRAÇÃO [%] | FUNÇÃO            |
|---------|------------------------------------|-------------|------------------|-------------------|
| A       | Aqua                               |             | 92,85            | solvente          |
|         | Betaine                            |             | 0,10             | ativo             |
|         | Glycerin                           |             | 3,00             | agente hidratante |
|         | Citric acid                        |             | 0,05             | ajustador de pH   |
|         | Sodium Lauroyl Sarcosinate         | ROKAtend LS | 2,00             | surfactante       |
| B       | Phenoxyethanol, Ethylhexylglycerin |             | 1,00             | conservante       |
|         | Propylene Glycol                   |             | 1,00             | solvente          |

|              |                       |                      |
|--------------|-----------------------|----------------------|
| pH           |                       | 5.0 - 7.0            |
| Aparência    | método visual         | líquido transparente |
| estabilidade | 1 mês a 5°C, RT, 40°C | confirmado           |

## Procedimento:

1. Em um recipiente principal, misture os ingredientes da fase A e aqueça até 65-70°C.

2. Combine os ingredientes da fase B em um recipiente separado e misture até ficar homogêneo.
3. Resfrie o lote até pelo menos 50°C enquanto mistura.

4. Adicione a fase B à fase A e misture bem.

5. Resfrie o lote até pelo menos 30°C enquanto mistura.
