# TVÄTT- & BADGEEL FÖR SPÄDBAR [KD-23]

| FAS | INCI NAMN                             | VARUMÄRKE     | KONCENTRATION [%] | FUNGERA            |
|-----|---------------------------------------|---------------|-------------------|--------------------|
| A   | Aqua                                  |               | 84,2              | lösningsmedel      |
|     | Lauryl Glucoside                      |               | 4,0               | tensid             |
|     | Sodium Benzoate,<br>Potassium Sorbate |               | 0,5               | konserveringsmedel |
|     | Glycerin                              |               | 2,0               | fuktgivande medel  |
|     | Lactic Acid                           |               | 0,3               | pH-justerare       |
| B   | Disodium Laureth Sulfosuccinate       | EXOsoft L3/40 | 2,0               | tensid             |
|     | Coco-Glucoside,<br>Glyceryl Oleate    |               | 0,5               | tensid             |
| C   | PEG-120 Methyl Glucose Dioleate       |               | 0,5               | förtjockningsmedel |
| D   | Cocamidopropyl Betaine                | ROKamina®K30  | 6,0               | tensid             |

|                 |                                                       |                           |
|-----------------|-------------------------------------------------------|---------------------------|
| Viskositet [cP] | Brookfield LV, spindel 34, hastighet 2,5 rpm, T: 25°C | 2000 - 8000               |
| Stabilitet      | 1 månad vid 5°C, RT, 40°C                             | bekräftad                 |
| Utseende        | visuell metod                                         | ljusgul, trögflytande gel |
| pH              |                                                       | 4.8 - 5.3                 |

## Procedur:

1. Kombinera ingredienser från fas A. Tillsätt ingredienser från fas A till varmt vatten (55-60°C). Blanda tills homogen lösning erhålls. Kyl satsen till minst 50°C.
  2. Tillsätt ingredienser från fas B. Blanda tills det är enhetligt.
  3. Tillsätt PEG-120 Methyl Glucose Dioleate under blandning. Blanda tills det är enhetligt. Kyl satsen till minst 30°C.
4. Tillsätt Cocamidopropyl Betaine under blandningen. Blanda tills det är enhetligt.
  5. Justera vid behov pH med mjölksyra till 4,8 – 5,3.
