| D    | Sodium Lauroyl<br>Sarcosinate                                                            | ROKAtend LS            | 2                 | surfactante     |
| E    | Cocamidopropyl<br>Betaine                                                                | ROKAmina®K30           | 15                | surfactante     |
| F    | Aqua, Glycerin, Cucumis<br>Sativus (Cucumber) Fruit<br>Extract, Citric Acid              |                        | 1                 | activo          |
| G    | Citric acid                                                                              |                        | q.s.              | regulador de pH |

|                    |                             |                                          |
|--------------------|-----------------------------|------------------------------------------|
| Viscosidad<br>[cP] | IKA Rotavisc Io-vi; T: 20°C | 15 000 – 16 000<br>(SULFOROKAnol L227/1) |
|                    |                             | 13 500 – 14 500<br>(SULFOROKAnol L325) 3 |
|                    |                             | 500 – 4 500<br>(SULFOROKAnol IT330))     |
| apariencia         | metodo visual               | gel transparente                         |
| pH                 |                             | 4.5-5.5                                  |

## Procedimiento:

- Mezclar el conservante y la betaína con agua hasta obtener una solución homogénea.
  - Añade glicerina y mezcla.
  - Luego agregue SULFOROKAnol L227/1 o SULFOROKAnol L325 o SULFOROKAnol IT330 y mezcle.
  - Agregue ROKAtend LS y mezcle.
- Luego agregue ROKAmina K30, mezcle.
  - Agregue el extracto de fruta de Cucumis Sativus (pepino) y mezcle.
  - Agregue solución de ácido cítrico hasta obtener un pH en la masa de alrededor de 4,5-5,5.
