

Rokacet K7

CHEMICAL NAME	Fatty acids, coco, ethoxylated
INCI NAME	PEG-7 Cocoate
CAS NUMBER	61791-29-5
FUNCTION	Emulsifier
TECHNICAL REQUIREMENTS	<p>Appearance clear or slightly turbid liquid with tendency to gelation and with a straw to light-brown colour</p> <p>Water content, %(m/m) max. 1</p> <p>Saponification number, mg KOH/g 104÷ 112</p> <p>pH of 1% solution 6.0 ÷ 8.0</p>
GENERAL DATA	<p>Solubility in water poor, turbid solution</p> <p>Other solvents methanol, ethanol, benzene, butyldiglycol</p> <p>Density at 50°C, g/ml approx. 1.01</p> <p>Solidification point, °C approx. 0</p> <p>Boiling point, °C above 200 (with decomposition)</p> <p>Flash-point, °C approximately 200</p> <p>Odour weak, characteristic</p>
APPLICATION	Rokacet K7 is used as a component of emulsifying, softening and antielectrostatic agents.
