

Rocrete SP

CHEMICAL NAME	Naphthalene sulfonic acid- formaldehyde polycondensate; sodium salt; (powder)
CAS NUMBER	9084-06-4
FUNCTION	Superplasticizer, Fluidising Agent
TECHNICAL REQUIREMENTS	Appearance.....powder with a colour light brown pH of 5% solution 7.5-10.5 Active substances, % (w/w)min. 85 Sodium sulphate calculated as dry matter, % (w/w)max. 5 Water content, % (w/w)max. 10 Chlorides, % (w/w)max. 0.1
GENERAL DATA	Solubility in water good Other solvents.....methanol
APPLICATION	Used as a concrete and cement mortar plasticizing and fluidizing admixture and as a dispersing agent used for the production of gypsum products.
