

Maxperse® 8913/PWDR

CHEMICAL NAME	Fatty Acid Amide
INCI NAME	-
CAS NUMBER	106-15-0
FUNCTION	Slip Agent, Dispersing Agent, Lubricant
TECHNICAL REQUIREMENTS	Melt Point Range, °C 98 Typical Acid Value..... 2.0
GENERAL DATA	Appearance @ 25°C Ivory White Powder Saponification Value 14 Water, % 0.5
APPLICATION	Maxperse®8913/PWDR is a hydroxy-stearamide wax developed primarily as a dispersant for pigments and other additives when compounding polyolefins. In addition to dispersant properties Maxperse®8913/PWDR also provides slip, antiblock and lubricating properties to a variety of polymer resins. Molded and extruded products exhibit improved gloss and a reduced tendency to pick up electrostatic charges on the surface. These added properties are attributable to the unique molecular structure of this product.
