

Chemeen C-5

CHEMICAL NAME	POE (5) Cocoamine
INCI NAME	-
CAS NUMBER	61791-14-8
FUNCTION	Emulsifier, Lubricant, Degreasing Agent
TECHNICAL REQUIREMENTS	Color (Gardner)..... 12 Maximum Neutralization Equivalent405 – 440 Water, % 1 Maximum Tertiary Amine, % 96 Minimum
GENERAL DATA	Appearance @ 25°CAmber Liquid Specific Gravity @ 25°C..... 0.98 Pounds Per Gallon..... 8.16 Aqueous Solubility Dispersible HLB..... 10.4
APPLICATION	Chemeen C-5 is commonly used in the metal working industry as a wetting agent, emulsifier and corrosion inhibitor. This surfactant exhibits maximum performance in a pH range of 4.0 - 8.0. In the textile area, Chemeen C-5 provides lubricity and antistatic properties and may also be utilized as an antistat for polymers.
