

EXOemul OM4

CHEMICAL NAME	Mixture of surfactants
INCI NAME	-
CAS NUMBER	-
FUNCTION	Emulsifier
TECHNICAL REQUIREMENTS	<p>Appearance at (20±25)°C..... yellow liquid</p> <p>Colour (Gardner units) at (20±25)°C..... max 5</p> <p>pH of 1% solution 7.0 ÷ 9.5</p>
GENERAL DATA	<p>Solubility in water insoluble</p> <p>Other solvents methanol, ethyl ether</p> <p>Density at 20°C, g/mL 0.950 ÷ 1.050</p> <p>Viscosity at 25°C, mPa·s approx. 40</p> <p>Odour characteristic</p> <p>Solidification point, °C below -20</p>
APPLICATION	<p>EXOemul OM4 is a mixture of surfactants with emulsifying properties for preparations based on paraffin oil SN150 and SN100. The product shows high emulsifying efficiency and ensures the stability of emulsions. The product can also be used as a highly efficient emulsifier of silicone oils.</p>
