

EXOclean MC

CHEMICAL NAME	Mixture
INCI NAME	-
CAS NUMBER	-
FUNCTION	Mixture of surfactants and corrosion inhibitor
TECHNICAL REQUIREMENTS	Appearance at temperature (20 ÷ 25) °Cclear, yellow liquid pH of 1% solution.....8.5 ÷ 10.5
GENERAL DATA	Odour..... .weak, characteristic Solubility in watertotal Viscosity at 20°C, cP.....approx. 300 Density at 20°C, g/mapprox. 1.03
APPLICATION	EXOclean MC is a product designed for cleaning and degreasing of metal surfaces in order to prepare them for applying coatings. The product is a mixture of surfactant and the corrosion inhibitor. It is intended for different types of metal surfaces: galvanized steel, cast iron, steel, non-ferrous metal alloys. To use the product, prepare a 5% solution and then apply it onto the surface depending on the method - manually or using a pressure washer. After use, rinse the surface with water.
