

## Oleic acid adduct

<b>CHEMICAL NAME</b>	Products of reaction of fatty acids with maleic anhydride.
<b>CAS NUMBER</b>	97675-80-4
<b>TECHNICAL REQUIREMENTS</b>	Appearance.....dark-brown homogeneous liquid without precipitate Dry matter, %(m/m).....min. 99 Maleic anhydride, %(m/m) .....max. 2
<b>GENERAL DATA</b>	Solubility in water ..... insoluble Other solvents.....methanol, chloroform, acetone Density at 50°C, g/ml .....0.981 Boiling point, °C .....approx. 300 Flash point, °C .....approx. 210 Odour.....characteristic
<b>APPLICATION</b>	As a component of various types of emulsions used in electroplating.
