

Rokanol[®] PL10

CHEMICAL NAME	Mixture of ethanolamine salts of phosphorus esters of ethoxylated fatty alcohol
INCI NAME	-
CAS NUMBER	-
FUNCTION	-
TECHNICAL REQUIREMENTS	Appearancebeige paste or wax pH of 5% solution.....6.0 ÷ 7.5 Acid value, mg KOH/g.....60 ÷ 90
GENERAL DATA	Solubility in watergood Other solvents.....methyl alcohol, ethyl alcohol, benzene Density at 50°C, g/mlapprox. 1.0 Flash point, °Capprox. 235 Solidification point, °Capprox. 30 Odour..... weak, characteristic
APPLICATION	Used as an antistatic and emulsifying agent in the fiber and household chemistry industries and mining.
