

EXOwet OS

CHEMICAL NAME	Mixture
INCI NAME	-
CAS NUMBER	-
FUNCTION	Product is dedicated to the effective wetting of cement grains during the production of concrete and cement mortars.
TECHNICAL REQUIREMENTS	<p>Appearance at (20±25)°C..... colorless to pale yellow liquid</p> <p>Active substance, %(m/m)..... 68 ÷ 72</p> <p>pH of 1% solution 5 ÷ 8</p>
GENERAL DATA	<p>Density at 20°C, g/mL approx. 1.1</p> <p>Solidification point, °C < -20</p>
APPLICATION	Product is dedicated to the effective wetting of cement grains during the production of concrete and cement mortars. The product increases the final strength of the concrete and improves the effectiveness of the plasticizing admixture. It is compatible with other surfactants.
