

## ROKAtend GL

<b>CHEMICAL NAME</b>	Reaction product of C8-C12 acid chlorides with glycine and sodium hydroxide
<b>INCI NAME</b>	Sodium lauroyl glycinate
<b>CAS NUMBER</b>	N/A
<b>FUNCTION</b>	Cleaning agent, foaming agent
<b>TECHNICAL REQUIREMENTS</b>	<p>Appearance at (20±25) 0C .....clear or slightly turbid liquid, colorless to pale yellow</p> <p>Active substance, % (m/m) .....19 ÷ 21</p> <p>Free fatty acids, % (m/m) .....max 2,5</p> <p>Dry matter, % (m/m) .....24 ÷ 29</p> <p>pH of 10% solution .....10 ÷ 11</p> <p>Chlorides as NaCl, % (m/m) .....4 ÷ 5,5</p> <p>Glycerol, % (m/m) .....0,5 ÷ 1</p>
<b>GENERAL DATA</b>	<p>Viscosity at 25 °C, cP .....max 3500</p> <p>Glycine, % .....max 1</p>
<b>APPLICATION</b>	Mild surfactant with very good foaming abilities, reducing irritating properties of other surfactants, especially SLES. It has excellent cleaning properties and contributes to the long-term feeling of comfort and skin softness due to strong adsorption on the protein surface.
