

Roksol SR22

CHEMICAL NAME	A mixture of surfactants
TECHNICAL REQUIREMENTS	Appearance at room temperature.....light brown to dark brown oily liquid (tends delamination in: the upper layer is more clear, muddy bottom passing in the form of a pasty) Water content, % (m/m)max. 1 Amine value, mg KOH/g.....23 ÷ 31
GENERAL DATA	Solubility in watergood Other solvents.....methyl alcohol, ethyl alcohol, toluene Density at 20°C, g/mlapprox. 1.05 Boiling point, °C above 200 with decomposition Solidification point, °Capprox. 15 Flash point, °C above 250 Odor.....characteristic
APPLICATION	Used as an equalizator in the fibre dyeing processes.
